HEXAGON

Nexus

Accelerate innovation and bring your ideas to life faster than ever before

Nexus is Hexagon's new Digital Reality Platform for manufacturers that connects people, technologies and data to accelerate innovation and bring ideas to life faster than ever before.

Break silos and put data to work

By connecting data across functions, Nexus enables collaboration and breaks down barriers between different engineering disciplines.

Build on Hexagon's manufacturing expertise

Nexus simplifies access to world-leading manufacturing expertise from Hexagon and our partner ecosystem.

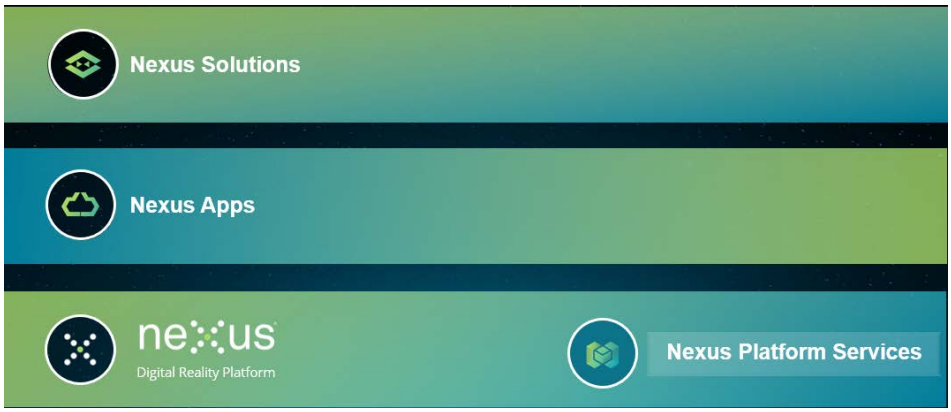
Experience the freedom of an open platform

Reimagine your operations with an open platform that meets you where you are – starting with the technology you already own and bringing innovation at your own pace.

Nexus delivers

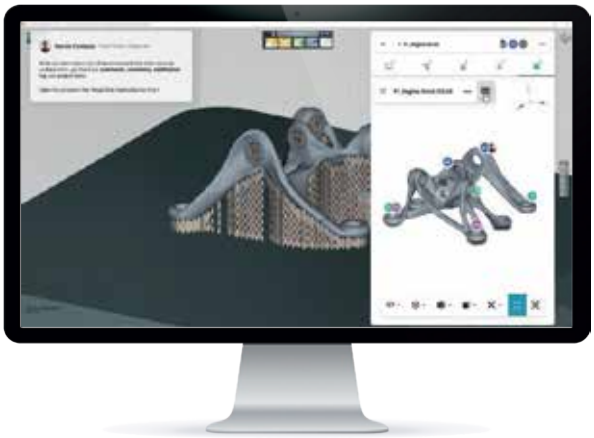
- **Speed:** Faster time to market through fluid collaboration & automated data sharing
- **Efficiency:** Time and cost savings due to increased visibility and faster decision making across disciplines
- **Productivity:** Unlock further improvements in productivity through faster feedback loops across the entire product lifecycle
- **Optimal Data Sharing:** Only share the data needed to solve a particular problem

Nexus: One platform. Endless possibilities



- Nexus is built on Microsoft Azure and enables connected workflows enhanced with visualization, compute, artificial intelligence and other capabilities.
- Cloud-native Apps and Solutions are built on Nexus using its capabilities.
- Nexus also provides easy access to products, training and support in one place.

Easy access to products, training & support



Apps & Solutions built on Nexus Platform to drive productivity

Nexus - Unlocking value

- Fully open and agnostic platform bringing together technologies from Hexagon & partners.
- Enables fluid engineering collaboration and agile feedback loops.
- Empowers end users by providing tools to build custom solutions and workflows for their unique needs.

Nexus - Unique features

- Easy access to your projects and data through cloud.
- De-centralized access to real-time data; CAD-agnostic; shop-floor centric.
- Accessible from SMBs to OEMs.
