

PRESS RELEASE

FOR IMMEDIATE RELEASE

EXPANSION OF METROLOGY SERVICES

Hi-Tech Metrology is pleased to announce the appointment of Paul Mayberry as Metrology Services Manager and the recent addition of Robert O'Flynn as CMM programmer.

According to Hi-Tech Metrology's managing director Mr. Ian Martin ... "Since joining Hi-Tech in 2000 Paul has become a key member of this team and through his total customer commitment has duly earned the respect of all our clients. Paul's primary focus in his new role will be to consolidate our current services offered such as software support, machine calibrations, preventative maintenance schedules, training courses, etc. and to establish new value added services such as contract inspection both on customer sites and in our new laboratory.

Rob O'Flynn joins us at a particularly exciting time as we expand our metrology services, Rob brings with him over 25 years experience programming CMM's and a wealth of practical knowledge pertinent to quality control in manufacturing. With our customers now more than ever keen to draw on our expertise it is vital that we are pro-active in ensuring we have the resources available, our aim is to offer a rapid turnaround on metrology services and excellent equipment availability in our new Contract Inspection facility."

Hi-Tech Metrology is an Australian company dedicated to supporting some of the finest automated and manual measuring systems available from around the world. Products include hand held instruments through to large gantry-style co-ordinate measuring machines (CMM) and the latest software control and measurement tools. Hi-Tech Metrology has equipment available to suit almost every industrial metrology application – with full support and back-up from a specialist measurement systems business.
